

# NAS CONFIGURATION CONTROL DECISION

Page 1 of 2

1. CCD No.        N23039	2. Case File No. SD110-NAS-001
3. NCP Title  Baseline the attached set of data elements and include in appendix A of FAA-STD-060.	
4. Site Location(s) (Local or Test NCPs/CCDs only)  N/A	5. Configuration Item Designator(s)  NAS
6. Action Directed  This CCD approves NCP 23039 dated August 1, 2000.  <u>ACTION</u>  ASD-100    . Coordinate publication and distribution of updated appendix A of FAA-STD-060. . Ensure copies of the document are delivered to ACM-20 (DCC).  AIO-300    . Update the registration status of subject data elements in the FAA Data Registry to "standard".  DCC         . Create/Update records on DOCCON for document cited above in accordance with this CCD. Notify ACM-20 that the documentation has been received  ACM-20     . Update CM/STAT to reflect closure of actions.   Upon completion of the above actions, sign the gird attached to this CCD form and forward a copy to ACM-20.	
7. Remarks or Explanation of Disapproval  Attached: Resolution of Comments	
8. Decision  <input checked="" type="checkbox"/> Approval  <input type="checkbox"/> Disapproval	9. Date  12/6/01
10. Signature and Title <div style="text-align: center;">   <hr/> <b>NAS CCB Co-Chair</b>    <hr/> <b>NAS CCB Co-Chair</b> </div>

<b>Data Identifier-Version<sup>1</sup>:</b>	<div>228 Ver. 1.0</div>
<b>Registration Authority Identifier<sup>1</sup>:</b>	<div>00508BCDF805</div>
<b>Registration Status<sup>1</sup>:</b>	<div>Certified</div>
<b>Administered Component Name<sup>2</sup>:</b>	<div>AIRPORT_HighestLandingAreaPoint_elevation-MSL</div>
<b>Administered Component Type<sup>2</sup>:</b>	<div>Data Element</div>
<b>Data Type<sup>2</sup>:</b>	<div>Real</div>
<b>Preferred Format<sup>2</sup>:</b>	<div>(-)(n)(n)(n)(n)(n)(.n) ; where n is a number 0-9, and (n) is an optional number with (.n) representing tenths. (-) is an optional sign for a negative value associated with distances below the MSL datum.</div>
<b>Permissible Value<sup>2</sup>:</b>	<div>-999.9 through 99999.9</div>
<b>Measurement System<sup>2</sup> (Units):</b>	<div>US Measure (Feet)</div>
<b>Example<sup>1</sup>:</b>	<div>35.2 Feet</div>
<b>Definition<sup>2</sup>:</b>	<div>The vertical distance to the highest point on the landing area of the airport measured from the Mean Sea Level (MSL) datum and reported in a unit of measure.</div>
<b>Steward Organization<sup>1</sup>:</b>	<div>ATA-100</div>
<b>Steward POC<sup>1</sup>:</b>	<div></div>

**Notes:**

1. IAW FAA-STD-060 the FAA Data Registry (FDR) is the authoritative source for FAA Data Standards. These meta-attributes are information in support of the NIAC Data Standards Process and presentation to the NAS CCB.
2. These meta-attributes are mandatory for compliance in FAA new development activities.

<b>Data Identifier-Version<sup>1</sup>:</b>	<div>234 Ver. 1.0</div>
<b>Registration Authority Identifier<sup>1</sup>:</b>	<div>00508BCDF805</div>
<b>Registration Status<sup>1</sup>:</b>	<div>Certified</div>
<b>Administered Component Name<sup>2</sup>:</b>	<div>AIRPORT_Location_identifier-FAA</div>
<b>Administered Component Type<sup>2</sup>:</b>	<div>Data Element</div>
<b>Data Type<sup>2</sup>:</b>	<div>String</div>
<b>Preferred Format<sup>2</sup>:</b>	<div>aaa(a); where a is a character A-Z or 0-9 and (a) is an optional character.</div>
<b>Permissible Value<sup>2</sup>:</b>	<div>Approved List (FAA Order 7350.7)</div>
<b>Measurement System<sup>2</sup> (Units):</b>	<div>N/A</div>
<b>Example<sup>1</sup>:</b>	<div>AK38</div>
<b>Definition<sup>2</sup>:</b>	<div>The location identifier assigned to an airport landing facility under jurisdiction of the US FAA National Airspace System (NAS).</div>
<b>Steward Organization<sup>1</sup>:</b>	<div>ATA-100</div>
<b>Steward POC<sup>1</sup>:</b>	<div></div>

**Notes:**

1. IAW FAA-STD-060 the FAA Data Registry (FDR) is the authoritative source for FAA Data Standards. These meta-attributes are information in support of the NIAC Data Standards Process and presentation to the NAS CCB.
2. These meta-attributes are mandatory for compliance in FAA new development activities.

<b>Data Identifier-Version<sup>1</sup>:</b>	<div>235 Ver. 1.0</div>
<b>Registration Authority Identifier<sup>1</sup>:</b>	<div>00508BCDF805</div>
<b>Registration Status<sup>1</sup>:</b>	<div>Certified</div>
<b>Administered Component Name<sup>2</sup>:</b>	<div>AIRPORT_Location_identifier-ICAO</div>
<b>Administered Component Type<sup>2</sup>:</b>	<div>Data Element</div>
<b>Data Type<sup>2</sup>:</b>	<div>String</div>
<b>Preferred Format<sup>2</sup>:</b>	<div>aaaa; where a is a character A-Z or 0-9.</div>
<b>Permissible Value<sup>2</sup>:</b>	<div>Approved List (FAA Order 7350.7 and ICAO 7910)</div>
<b>Measurement System<sup>2</sup> (Units):</b>	<div>N/A</div>
<b>Example<sup>1</sup>:</b>	<div>KDCA</div>
<b>Definition<sup>2</sup>:</b>	<div>The landing facility location identifier that was created in accordance with the ICAO rules, assigned to the airport, and must be employed in filing of international flight plans conducted under the ICAO rules.</div>
<b>Steward Organization<sup>1</sup>:</b>	<div>ATA-100</div>
<b>Steward POC<sup>1</sup>:</b>	<div></div>

**Notes:**

<b>Data Identifier-Version<sup>1</sup>:</b>	<div>230 Ver. 1.0</div>
<b>Registration Authority Identifier<sup>1</sup>:</b>	<div>00508BCDF805</div>
<b>Registration Status<sup>1</sup>:</b>	<div>Certified</div>
<b>Administered Component Name<sup>2</sup>:</b>	<div>AIRPORT_LocationElevationEllipsoidalDatumTieAccuracy_percent</div>
<b>Administered Component Type<sup>2</sup>:</b>	<div>Data Element</div>
<b>Data Type<sup>2</sup>:</b>	<div>Integer</div>
<b>Preferred Format<sup>2</sup>:</b>	<div>(n or -)(n)(n)(n)(n)(n)(n)(n)n; where n is a number 0-9, (n) is an optional value and (-) is a negative mathematical sign.</div>
<b>Permissible Value<sup>2</sup>:</b>	<div>-999999999 through 999999999</div>
<b>Measurement System<sup>2</sup> (Units):</b>	<div>US Measure (Feet)</div>
<b>Example<sup>1</sup>:</b>	<div>-18</div>
<b>Definition<sup>2</sup>:</b>	<div>The value is measure of the accuracy of the location of the airport landing facility elevation due to the tie to the specified datum expressed as a ratio relative to the national spatial reference system (NSRS) as a percent of the distance from the NSRS tie station.</div>
<b>Steward Organization<sup>1</sup>:</b>	<div>ATA-130</div>
<b>Steward POC<sup>1</sup>:</b>	<div>D. Thompson</div>

**Notes:**

1. IAW FAA-STD-060 the FAA Data Registry (FDR) is the authoritative source for FAA Data Standards. These meta-attributes are information in support of the NIAC Data Standards Process and presentation to the NAS CCB.
2. These meta-attributes are mandatory for compliance in FAA new development activities.

<b>Data Identifier-Version<sup>1</sup>:</b>	<div>229 Ver. 1.0</div>
<b>Registration Authority Identifier<sup>1</sup>:</b>	<div>00508BCDF805</div>
<b>Registration Status<sup>1</sup>:</b>	<div>Certified</div>
<b>Administered Component Name<sup>2</sup>:</b>	<div>AIRPORT_LocationElevationHorizontalDatumTieAccuracy_percent</div>
<b>Administered Component Type<sup>2</sup>:</b>	<div>Data Element</div>
<b>Data Type<sup>2</sup>:</b>	<div>Integer</div>
<b>Preferred Format<sup>2</sup>:</b>	<div>(n or -)(n)(n)(n)(n)(n)(n)(n)n; where n is a number 0-9, (n) is an optional value and (-) is a negative mathematical sign.</div>
<b>Permissible Value<sup>2</sup>:</b>	<div>-999999999 through 999999999</div>
<b>Measurement System<sup>2</sup> (Units):</b>	<div>US Measure (Feet)</div>
<b>Example<sup>1</sup>:</b>	<div>37</div>
<b>Definition<sup>2</sup>:</b>	<div>The measure of the accuracy of the location of the airport landing facility elevation due to the tie to the specified datum expressed as a ratio relative to the national spatial reference system (NSRS).</div>
<b>Steward Organization<sup>1</sup>:</b>	<div>ATA-130</div>
<b>Steward POC<sup>1</sup>:</b>	<div>D. Thompson</div>

**Notes:**

1. IAW FAA-STD-060 the FAA Data Registry (FDR) is the authoritative source for FAA Data Standards. These meta-attributes are information in support of the NIAC Data Standards Process and presentation to the NAS CCB.
2. These meta-attributes are mandatory for compliance in FAA new development activities.

<b>Data Identifier-Version<sup>1</sup>:</b>	231 Ver. 1.0
<b>Registration Authority Identifier<sup>1</sup>:</b>	00508BCDF805
<b>Registration Status<sup>1</sup>:</b>	Certified
<b>Administered Component Name<sup>2</sup>:</b>	AIRPORT_LocationElevationHorizontalEllipsoidDatum_code
<b>Administered Component Type<sup>2</sup>:</b>	Data Element
<b>Data Type<sup>2</sup>:</b>	String
<b>Preferred Format<sup>2</sup>:</b>	(a)(a)(a)(a)(a)(a)aaa; where a = character A-Z, or a-z or 0-9 and the dash (-). (a) denotes optional characters.
<b>Permissible Value<sup>2</sup>:</b>	Approved List (FAA NO. 405)
<b>Measurement System<sup>2</sup> (Units):</b>	N/A
<b>Example<sup>1</sup>:</b>	NAD-83
<b>Definition<sup>2</sup>:</b>	A code specifying the geodetic datum ellipsoid employed in describing the horizontal coordinates of the airport landing facility reference point.
<b>Steward Organization<sup>1</sup>:</b>	ATA-130
<b>Steward POC<sup>1</sup>:</b>	D. Thompson

**Notes:**

1. IAW FAA-STD-060 the FAA Data Registry (FDR) is the authoritative source for FAA Data Standards. These meta-attributes are information in support of the NIAC Data Standards Process and presentation to the NAS CCB.
2. These meta-attributes are mandatory for compliance in FAA new development activities.

<b>Data Identifier-Version<sup>1</sup>:</b>	<div>233 Ver. 1.0</div>
<b>Registration Authority Identifier<sup>1</sup>:</b>	<div>00508BCDF805</div>
<b>Registration Status<sup>1</sup>:</b>	<div>Certified</div>
<b>Administered Component Name<sup>2</sup>:</b>	<div>AIRPORT_LocationElevationOrthometricDatum_code</div>
<b>Administered Component Type<sup>2</sup>:</b>	<div>Data Element</div>
<b>Data Type<sup>2</sup>:</b>	<div>String</div>
<b>Preferred Format<sup>2</sup>:</b>	<div>(a)(a)(a)(a)(a)(a)aaa; where a = character A-Z, or a-z or 0-9 and the dash (-). (a) denotes an optional character.</div>
<b>Permissible Value<sup>2</sup>:</b>	<div>Approved List (FAA NO. 405)</div>
<b>Measurement System<sup>2</sup> (Units):</b>	<div>N/A</div>
<b>Example<sup>1</sup>:</b>	<div>NAVD-88</div>
<b>Definition<sup>2</sup>:</b>	<div>The code specifying the reference orthometric datum used in computing the airport landing facility elevation at the specified location.</div>
<b>Steward Organization<sup>1</sup>:</b>	<div>ATA-130</div>
<b>Steward POC<sup>1</sup>:</b>	<div>D. Thompson</div>

**Notes:**

1. IAW FAA-STD-060 the FAA Data Registry (FDR) is the authoritative source for FAA Data Standards. These meta-attributes are information in support of the NIAC Data Standards Process and presentation to the NAS CCB.
2. These meta-attributes are mandatory for compliance in FAA new development activities.

<b>Data Identifier-Version<sup>1</sup>:</b>	232 Ver. 1.0
<b>Registration Authority Identifier<sup>1</sup>:</b>	00508BCDF805
<b>Registration Status<sup>1</sup>:</b>	Certified
<b>Administered Component Name<sup>2</sup>:</b>	AIRPORT_LocationElevationOrthometricDatumTieAccuracy_percent
<b>Administered Component Type<sup>2</sup>:</b>	Data Element
<b>Data Type<sup>2</sup>:</b>	Integer
<b>Preferred Format<sup>2</sup>:</b>	(n or -)(n)(n)(n)(n)(n)(n)(n)n; where n is a number 0-9, (n) is an optional value and (-) is an optional negative mathematical sign.
<b>Permissible Value<sup>2</sup>:</b>	-999999999 through 999999999
<b>Measurement System<sup>2</sup> (Units):</b>	US Measure (Feet)
<b>Example<sup>1</sup>:</b>	42
<b>Definition<sup>2</sup>:</b>	The measure of the accuracy of the location of the airport landing facility elevation due to the tie to the specified datum expressed as a ratio relative to the national spatial reference system (NSRS) as a percent of the distance from the NSRS tie station.
<b>Steward Organization<sup>1</sup>:</b>	ATA-130
<b>Steward POC<sup>1</sup>:</b>	D. Thompson

**Notes:**

1. IAW FAA-STD-060 the FAA Data Registry (FDR) is the authoritative source for FAA Data Standards. These meta-attributes are information in support of the NIAC Data Standards Process and presentation to the NAS CCB.
2. These meta-attributes are mandatory for compliance in FAA new development activities.

## Definitions of meta attributes for case file 1

The data standards in this case file (SD110-NAS-001) are application-independent and will be used by developers in their preparation of interface requirements specifications. Names in applications may necessarily be shortened versions of the Descriptive Name to accommodate software constraints.

**Data Identifier-Version**—A number that is unique in the data registry used to identify an administered component in the registry - a number that identifies the latest or a previous update of an administered component. This meta attribute is used in registry operation and is not pertinent to compliance in development activities.

**Registration Authority Identifier**—An internationally unique identifier assigned to FAA as and internationally recognized registration authority. The registration authority identifier together with the data identifier and version form an internationally unique identifier for an administered component in the FAA Data Registry. This meta attribute is used in registry operation and is not pertinent to compliance in development activities.

**Registration Status**—A designation of the position of an administered component in the registration life cycle. Allowable values are the following:

Incomplete—The registered administered component does not contain entries in all mandatory meta attributes.

Recorded—The registered administered component contains entries in all mandatory meta attributes, but the entries may not meet quality requirements specified in ISO 11179, *Specification and Standardization of Data Elements*, and requirements specified in the *FAA NAS Data Standardization Procedures*.

Certified—The registered administered component contains entries in all mandatory meta attributes, and the entries meet quality requirements specified in ISO 11179, *Specification and Standardization of Data Elements*, and requirements specified in the *FAA NAS Data Standardization Procedures*.

Standard—The registered administered component has been approved as a FAA NAS standard for data interchanges.

Retired—The registered administered component is no longer approved for use in FAA NAS data interchanges.

This meta attribute is used in registry operation and is not pertinent to compliance in development activities

**Administered Component Name**—A single or multiword designation assigned to a data concept constructed in accordance with the FAA Data Registry (FDR) naming conventions. This name is unique within the Data Registry. This meta attribute is mandatory for compliance in development activities.

**Administered Component Type**—The name of a class of administered component. Allowable class names are as follows:

Data element—A structured representation of an item of interest (property) about something (object class).

Data element concept—An item of interest (property) about something (object class) without a specific structured representation.

Object class—A set of ideas, abstractions, or things in the real world that can be identified with explicit boundaries and meaning, and whose properties and behavior follow the same rules.

Property—A characteristic of an object class.

Value domain—A set of permissible values that provide representation but with no implication as to particular data elements they may be associated with nor what the values mean.

Conceptual domain—A set of possible valid value meanings expressed without specific representational form.

This meta attribute is used in registry operation and is not pertinent to compliance in development activities

**Data Type**—A classification of the type of data contained in a value domain in this case file (SD110-NAS-001):

Date—A representation of a Gregorian calendar date; a time period specified by a year, ordinal numbered month of the year, and ordinal numbered day of the month.

Integer—The standard mathematical concept of integer ("whole") numbers; any of the natural numbers, the negatives of these numbers, and zero.

Real—The standard mathematical concept of real (non-imaginary) numbers.

String—A finite character sequence of Universal Character Set characters specified in ISO 10646 and Unicode.

This meta attribute is mandatory for compliance in development activities.

**Preferred Format**—A statement of the form or layout of a representation for data interchange. This meta attribute is mandatory for compliance in development activities.

**Permissible Value**—The set of allowable instances of a value domain; the set can be specified by name, by reference to a source, by enumeration of the representation of the instances, or by rules for generating the instances. This meta attribute is mandatory for compliance in development activities.

**Measurement System (Units)**—The system of measurement used for quantitative instances of a value domain. This meta attribute is mandatory for compliance in development activities.

**Example**—A representative illustration of an administered component. This meta attribute is informational, not pertinent to compliance in development activities.

**Definition**—A statement that expresses the essential nature of an administered component and permits its differentiation from all other data items. This meta attribute is mandatory for compliance in development activities.

**Steward Organization**—The organization or unit within an organization that is responsible for the contents of the meta attributes by which the data item is specified. This meta attribute is used in registry operation and is not pertinent to compliance in development activities.

**Steward POC**—The name of an individual in the steward organization who is responsible for the contents of the meta attributes by which the data item is specified. This meta attribute is used in registry operation and is not pertinent to compliance in development activities.
